

# brings you a **simplified** Print & Cut solution

"SignLab 7 is designed to simplify the complex production environment found in today's busy sign business. From its advanced design engine to its enterprise work flows to its e-commerce features that help sign shops connect to their customers, SignLab 7 is all about Printing and Cutting in the modern sign business."

# 7

version

## SignLab Vinyl \$1200 US

SignLab Vinyl is strongly featured design and production sign software for vinyl cutting only. Suitable for the new sign shop or established shop that does not need a full time designer — where designer's duties are split between design and sign assembly.

## SignLab Vinyl Pro \$2000 US

SignLab Vinyl Pro is the ultimate sign design and production software for vinyl cutting only. Developed for professional level sign shops that have one-or-more full time designers, where interactivity with 3rd party design applications and design efficiency for complex signage is important. Provides effective production tools to manage significant volumes of vinyl cut signage, but limited support for in-house printing of signage.

## SignLab 7 Print & Cut \$2800 US

SignLab Print & Cut is the sign industry's only enterprise level design and production software for sign printing and vinyl cutting. Designed for busy, professional level sign shops that design in both vector and full color raster images, where interactivity with 3rd party design applications is important and where the highest quality and efficient throughput from a wide array of cutters, ink jet and thermal sign printers is essential. Provides effective production tools to manage significant volumes of vinyl cut signage and digitally printed signage.

## SignLab 7 Print & Cut Server \$3300 US

Designed for busy, professional level sign shops that design in both vector and full color raster images, where interactivity with 3rd party design applications is important, and where the highest quality and efficient throughput from a wide array of cutters, ink jet and thermal sign printers is essential. Provides effective production tools to manage significant volumes of vinyl cutting and digitally printed signage, including sign shops that require output through a multiple of networked printers and cutters.

## SignLab Add-on components

## SignLab 7 Vinyl "Designer" \$700 US

Designer is a "design only" version of either the SignLab Vinyl or Vinyl Pro packages. Is installed in a second design station providing extra design capabilities to the busy sign shop. Customer must have a corresponding full version of SignLab 7 Vinyl or Vinyl Pro to qualify. Designer packages cannot output to printers or cutters nor export nor copy/paste files.

## Site License 40% off list price per additional seat(s) at same site only

An additional "seat" of SignLab Vinyl, Vinyl Pro and Print & Cut. The site license must have features not exceeding those of the original SignLab seat.

## Assured Production Program (APP)

The Assured Production Program, (APP), is designed to reduce SignLab customers' production down time by giving them preferred access to CADlink's technical support and new software features as they become available.

PROGRAM DETAILS — SEE WEBSITE OR ASK DEALER

## Spot Color Printing Module (Thermal Printing) \$650 US

The Spot Color Printing module activates additional design tools in any Print & Cut package, which allow the creation of unique and beautiful spot color design effects that gives the sign shop new design capabilities to offer their customers. For Edge 1 & 2™, DC3™, Nautilus™, Matan™ and other "thermal" printers, this module includes full support for Gerber Edge™ foils, as well as 3rd party Edge™ foils. Patent pending "Perforated Windows" feature is just one of the many unique features to increase sales for thermal printing output.

## SignLab Online Factory Training Suite

from \$ 89.00 — see website details

## SignLab 7 Print & Cut "Designer" \$1200 US

Print & Cut Designer is an economical "design only" version of a full Print & Cut package with neither the SignLab cutting engine nor the export/cut/copy/paste. Can send print and print & cut files to a Remote Print & Cut Manager or another SignLab Print & Cut package installed on a remote network computer for processing files to connected printers and cutters.

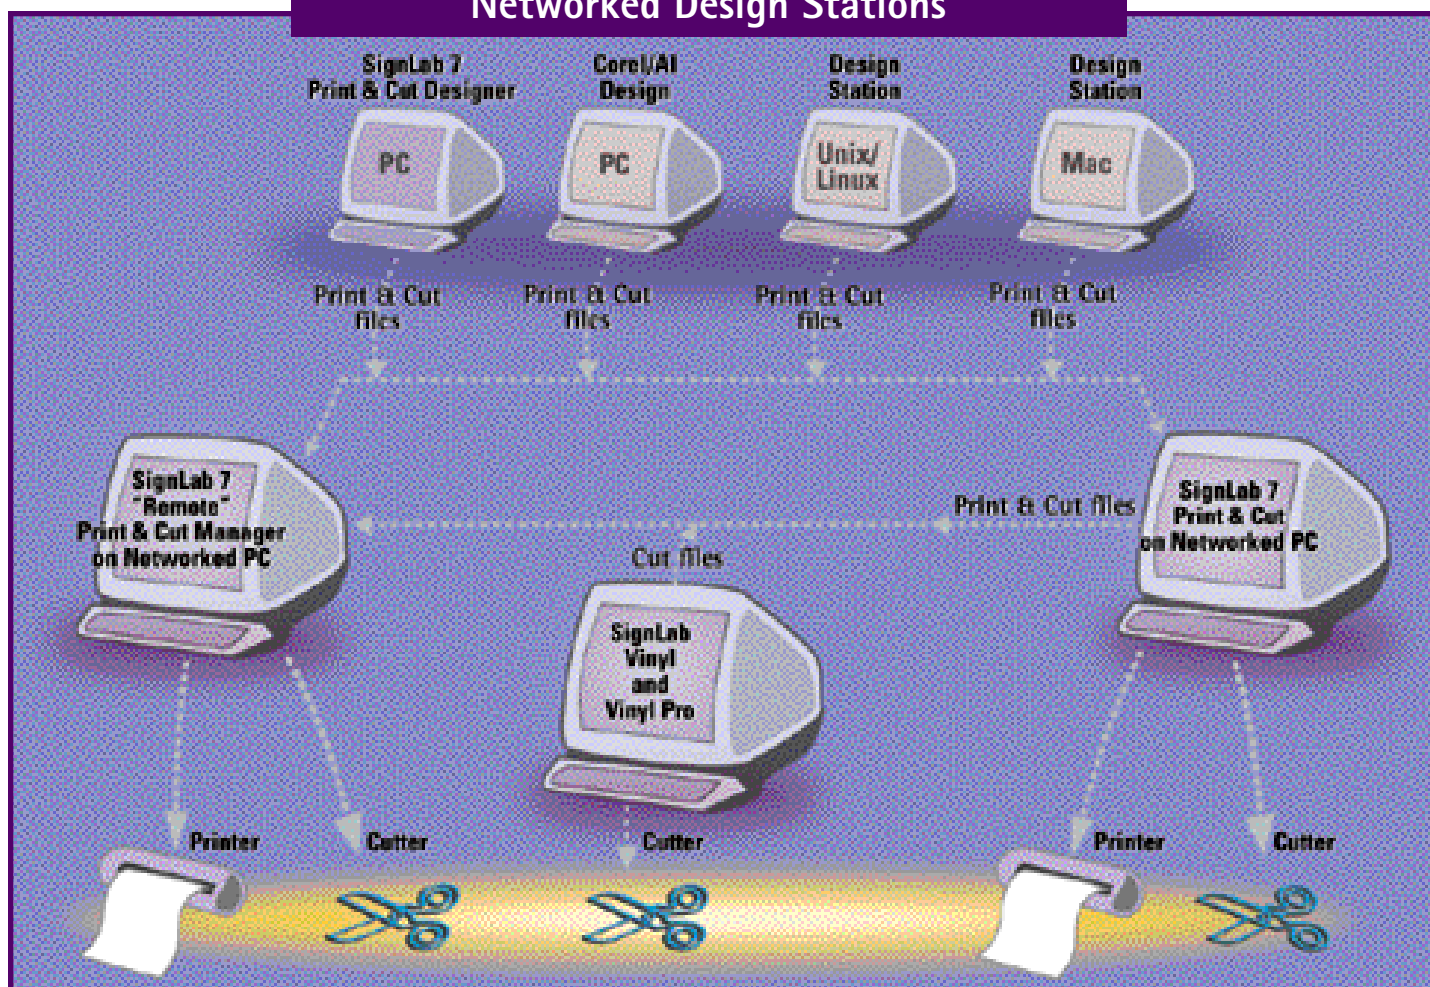

## "Remote" Print & Cut Manager \$650 US

Is an inexpensive RIP "add on" to any network computer converting it into an efficient production server for processing SignLab files and PostScript files through any cutter or large format printer connected to that computer. Is ideal for shops with a multiple of output devices requiring multiple networked servers to process large numbers of daily production files efficiently.

## hardware

Item #	Description	Suggested list price	
		US	CDN
HAR SLFSTBRD	CADlink FastBoard required for Signmaker III, IV, Sprint I and II, S750 plotter	\$ 500	\$ 700

Ginsu knife	●	●	●	●
5000+ clip-art	●	●	●	●
Decorative borders	●	●	●	●
Rulers and dials	●	●	●	●
Monument Shapes	●	●	●	●
<b>Cutting Tools</b>				
Cut preview	●	●	●	●
Print and cut: contour apply/cut	●	●	●	●
Updated cutter drivers (150+)	●	●	●	●
Plot spooling	●	●	●	●
Interactive tiling /paneling for printing and cutting	●	●	●	●
Cut time estimator	●	●	●	●
Cut sorting	●	●	●	●
Tool tracker	●	●	●	●
Pen fills	●	●	●	●
Power weed	●	●	●	●
Contour cut with auto-bleed	●	●	●	●
Multi cut passes for thick materials	●	●	●	●
Send & receive cut files across network	●	●	●	●
Production queue supports multi cutters on multiple ports	●	●	●	●
Auto-schedule and archive cut files	●	●	●	●
Cut contour lines in linked EPS files	●	●	●	●
<b>Text Tools</b>				
WYSIWYG text layout (horizontal/vertical)	●	●	●	●
Font detective	●	●	●	●
Printing bitmap typestyles (30+)	●	●	●	●
Insert symbol	●	●	●	●
Text/invert text to arc	●	●	●	●
Interactive kerning	●	●	●	●
1100+ fonts + TrueType™ + Corel™ font support	●	●	●	●
Spell checker	●	●	●	●
Fit text to path	●	●	●	●
Font creator	●	●	●	●
Auto kerning	●	●	●	●
Upper/lower case control	●	●	●	●
Text compression	●	●	●	●
Extended character set preview	●	●	●	●
Copy/apply text attributes	●	●	●	●
Multiple text selection	●	●	●	●
Equal spacing controls	●	●	●	●
Embed fonts with saved native files	●	●	●	●
PostScript and URW font support	●	●	●	●
<b>Special Effects</b>				
Create and edit strokes & vary stroke by scale factor	●	●	●	●
Image cut	●	●	●	●
Automatic striping	●	●	●	●
Inline/outline	●	●	●	●
Shadows: perspective, cast, drop, block	●	●	●	●
Metamorphosis	●	●	●	●
Distortions/special effects	●	●	●	●
Chisel effect	●	●	●	●
Multi color gradient fills – process colors	●	●	●	●
Retain object fills after welding	●	●	●	●
Save pattern fills to palette	●	●	●	●
Fantastic Fills library	●	●	●	●
<b>Power Tools</b>				
Badge maker: auto substitute objects with serialization	●	●	●	●
Digitizing support	●	●	●	●
CenterLine tracing	●	●	●	●
AccuScan: B/W vectorization	●	●	●	●
InstantReplay	●	●	●	●
Registration marks	●	●	●	●
Nesting	●	●	●	●
Dimensioning, measure and add labels	●	●	●	●
Clipping / masking	●	●	●	●
Fit object to path	●	●	●	●
Fuse weld	●	●	●	●
Color welds	●	●	●	●
Convert stroke to cut outlines	●	●	●	●
Constant stroke stretching	●	●	●	●
Auto trap overlapping objects with bleed/choke	●	●	●	●
Color vectorization	●	●	●	●
<b>Bitmap Tools</b>				
Link bitmaps	●	●	●	●
Bitmap select (lasso, marquee, magic wand, custom)	●	●	●	●
B&W bitmap edit	●	●	●	●
Color bitmap edit	●	●	●	●
Texture and pattern bitmap fills	●	●	●	●
Levels filter	●	●	●	●
Filters (blur, sharpen, emboss, lighten, invert, red-eye, etc.)	●	●	●	●
Color adjustment tools	●	●	●	●
Color sampler (eyedropper)	●	●	●	●
Adobe™ "Plug-In" support	●	●	●	●

<b>Sign Printing Tools</b>				
Improved PostScript 3 RIP	●	●	●	●
Single production queue supports multiple printers/ports	●	●	●	●
Send and receive print and cut files across a network	●	●	●	●
Job archiving	●	●	●	●
Job scheduling	●	●	●	●
Hot folder support for cross platform printing	●	●	●	●
RIP and print over Network	●	●	●	●
RIP & Print jobs on remote print server	●	●	●	●
RIP & Print multiple jobs simultaneously	●	●	●	●
Direct print from PhotoShop™, Corel™, AI, Quark™, etc.	●	●	●	●
Variable dot printer support	●	●	●	●
Support for up to 64 colors	●	●	●	●
Preview raw print data, pixel by pixel, for each color channel	●	●	●	●
Contour cutting on hybrid print & cut devices	●	●	●	●
Decal mode–RIP once, print many	●	●	●	●
Link TIFF/EPS/DCS-EPS files, substitute custom colors with Gerber foils or other "named" colors	●	●	●	●
In-RIP priming	●	●	●	●
In-RIP trapping for overprints	●	●	●	●
Apply halftones individual bitmaps and line art	●	●	●	●
Super Cell screening	●	●	●	●
Vary print parameters by color channel	●	●	●	●
LPT, firewire, TCP/IP, USB support	●	●	●	●
Image interpolation	●	●	●	●
Scale, mirror, invert, rotate and print job	●	●	●	●
Soft proofing	●	●	●	●
ICC profile support	●	●	●	●
RIP CMY, CMYK, Hex, CMYKcLm, Hex+LcLm	●	●	●	●
<b>e-Commerce Tools (time limited service)</b>				
e-proofs and quotes	●	●	●	●
Web site builder/ hosting	●	●	●	●
Web browser	●	●	●	●
e-portfolios	●	●	●	●

<b>Spot Color Printing (add on Module)</b>		
Item #	SL-0700-M-SPOTCOLORPRINT	
Print direct Edge 1 & 2™		optional optional
Edge "Firing" files for Gerber™ and 3rd party foils		optional optional
Global priming		optional optional
Object priming		optional optional
Print prime by tint to prime spot & process tints		optional optional
Reduce base when priming tints		optional optional
Print spot as process		optional optional
In RIP priming of linked files		optional optional
In RIP trapping of overlapped objects		optional optional
Print Finish coat, "Flood page" and object by object		optional optional
Change foil order at print time		optional optional
CMY, CMYK and Hexachrome printing		optional optional
Minimize foil passes for Edge printing		optional optional
"Perforated Windows" printing feature		optional optional
Print "Simulated process" color from PhotoShop		optional optional
Apply halftones individual bitmaps and line art		optional optional
Auto trap with auto heat adjust for Edge printing		optional optional
Create duotones (Spectratones) by % tint		optional optional
Create spot swatches by varying % tint		optional optional
Fills with multi-spot color gradients		optional optional
Metamorphosis between 2 spot colors		optional optional
Create multi-tone bitmaps for spot printing		optional optional
Preview raw print data, foil by foil		optional optional
Multi-colour gradient fills - spot and process colours		optional optional
